ADDITIONAL TRAINING COURSES

- 🔗 [Project Management Basics. Once learned: applicable always.](#)
- 🔗 [All other training courses](#)

YOUR BENEFITS

To successfully execute complex projects requires certain skills. With the combination of hard facts and soft skills, you can achieve the best results. But to ensure that these don't just remain empty phrases, you'll learn everything you need to know in this course.

Highlights:

- **Standards & Methods:** Effectiveness vs. efficiency, business analysis and the right way to deal with critical stakeholders. Here you'll learn the craft of Project Management.
- **Planning:** Quality management, risk management, cost planning and much more. The better the preparation at the start of your project, the more successful the end will be.

TARGET GROUPS

- Project Leaders and Team Members
- Project Sponsors and Managers
- Business Analysts and IT Architects

HOW, WHERE & WHEN

- Duration: Two days
- On site or remote (via video conference)
- All documents are provided digitally
- Language: German or English
- Dates: On request

YOUR TRAINER: RAINER VOLK

After more than 30 years in close collaboration with my clients I can say one thing is for sure: It's still fun! How else could I successfully execute over 100 training courses throughout all industries and company sizes?

- Learned the trade from the bottom up (Programmer, Project Manager and Team Lead)
- Training, Consulting, Coaching and external project support – all services from a single source
